Professional Summary

DevOps Engineer with **1.8+ years of experience** supporting banking-domain and cloud-native applications across **Development, UAT, and Production** environments. Skilled in **Kubernetes, Docker, Linux, Prometheus, Grafana, Shell scripting**, with hands-on experience in **production support, deployment automation, monitoring, and incident troubleshooting**. Strong team player focused on application reliability and operational stability.

Technical Skills

Cloud: AWS (EC2, S3, IAM)

CI/CD Tools: Jenkins, GitHub Actions, GitLab CI/CD, Argo CD

Containers & Orchestration: Docker, Docker Compose, Kubernetes, OpenShift, Helm

Monitoring & Logging: Prometheus, Grafana, ELK Stack

Operating Systems: Linux, Ubuntu

Scripting & Automation: Bash, Shell Scripting, Deployment Automation

Version Control: Git, GitHub, GitLab

Professional Experience

Scalezee Technologies Pvt. Ltd

Jul 2025 – Present

DevOps Engineer, Mumbai

- Supported **Development Team activities** by managing deployments across **Development, UAT, and Production** environments for banking-domain applications.
- Automated CI/CD pipelines using **Jenkins and GitHub Actions**, improving deployment consistency and reducing manual effort.
- Provided **production support** for containerized applications running on **Kubernetes/OpenShift**, ensuring service availability and operational stability.
- Investigated **pod failures, deployment issues, namespace-level incidents, and Linux server problems** to minimize downtime and support business operations.
- Monitored application and infrastructure health using **Prometheus and Grafana**, maintaining dashboards, alerts, and operational visibility.
- Collaborated with development, QA, security, and operations teams to improve release processes, monitoring, and production reliability.

Nimap Infotech LLP

Feb 2025 – Jul 2025

DevOps Engineer Intern, Mumbai

- Assisted development teams with **application deployment and CI/CD automation** using GitHub-based workflows.
- Supported **Linux, Docker, Kubernetes, and AWS** infrastructure operations and troubleshooting.
- Performed deployment verification, log analysis, and operational support for development and testing environments.
- Automated repetitive operational tasks using **Bash/Shell scripting**.
- Worked with GitHub repositories, containerized applications, and infrastructure monitoring activities.
- Managed source code repositories, branch workflows, merge requests, and CI/CD integration using GitLab.

Projects

Bank of Baroda – CBDC Platform

- Managed **Kubernetes/OpenShift deployments** using **Helm** and validated cluster health and application readiness.
- Executed weekly and monthly **Kubernetes/OpenShift deployments** using **Helm** across banking environments.
- Prepared **daily cluster health checklists and operational reports** for Kubernetes/OpenShift environments.
- Provided **production support** for banking applications, including deployment verification, incident troubleshooting, and service restoration.
- Implemented centralized monitoring and alerting using **Prometheus and Grafana**.
- Supported **MySQL/MariaDB replication, backup, recovery, and database troubleshooting** activities.

Muthoot Finance

- Designed and implemented automated **CI/CD pipelines** using **GitHub Actions**.
- Designed and deployed **multi-container Docker Compose applications** across **Development, Testing, and Production** environments.
- Managed **AWS EC2, IAM, and S3** infrastructure resources.
- Integrated **SonarQube** for code quality and security analysis.
- Performed deployment support and cloud infrastructure troubleshooting.

Education

B.Tech – Mechanical Engineering

2019 – 2024

Marathwada Institute of Technology, Chhatrapati Sambhajanagar
